

## What Parents have to Say

Emphasis on concepts, highlight of 'killer' questions, like the info given – by the types and level of maths with marks awarded was an eye-opener, good examples, understood the math problem-solving concepts better, It was lively, interesting and practical. I like the update on latest expectation, lively presentation with clarity and speaker was familiar with children's plight, helpful strategies especially reading and writing, knowledgeable speaker, highlight on common errors in approaching math problem-solving, good practical tips,

### **Workshop: Coaching your child in problem solving:**

#### **Developing their conceptual understanding**

**School: Fairfield Primary School**

**Date: 16th March 2013**

The teaching approach, realistic examples given, learnt the importance of drawing models to solve word problems. It gave some tips on how to do problem-solving sums. New concept and application of new methods. Learnt how to motivate the child in solving math problems, parallel questions. I liked the trainer's explanations.

### **Workshop: Coaching your child in problem solving:**

#### **Developing their conceptual understanding**

**School: East Coast Pr School**

**Date: 2nd Feb 2013**

The speaker was clear and very engaging, an effective speaker, knowledgeable and able to express thoughts and concepts in simple layman terms, the contents are not boring, workshop is peppered with many useful tips, practical methodologies and clear examples (including those from everyday life), stimulating, witty and humorous, clear and concise presentation, very insightful, great presentation skills by the speaker. It is very informative, lively and practical. The session highlighted the common mistakes we make as parents when coaching our kids. Clarity of teaching of mathematical concepts, exposure to different types of problems and questions, logical ways to help our kids, extended additional time to go thru all questions, exposure to actual PSLE questions, stress on fundamentals, good and clear explanations of issues faced by students, relating everyday life with mathematics, interesting examples that make parents remember.

### **Workshop: Coaching your child in problem solving:**

#### **Developing their conceptual understanding**

**School: Nanyang Primary School**

**Date: 6th April 2013**

Trainer is very patient and systematic in explaining the difficult problem sums. The detailed explanation from the trainer and the variation of methods used to solve a single question. Step-by-step approach to digest every statements in the math problem. The detailed explanantion is very useful. Detailed graphic of methods presentation. Clear and precise. Able to learn different tactics; practical practice. I have a clearer picture on how to teach my child.

**Workshop: Coaching Your Child Effectively P5 & P6 Parents Math Workshop**

**School: Mee Toh School**

This workshop enables us, the parents, to understand and apply the correct methods used in solving problem sums, Trainer's presentation is clear and useful, very concised and well paced. Very engaging - learn strategies which we were never taught. Complex concepts made and explained simply via step-by-step explanantion. Clear, precise, learn and understand better on Mathematics problem solving. Know how to answer effectively, know the short cuts to solve maths problems.

**Workshop: Coaching Your Child Effectively P3 & P4 Parents Math Workshop**

**Developing their conceptual understanding**

**School: Mee Toh School**

**Date: 14 February 2014**

Sufficient problem types and helpful error analysis section, learnt how to help my child better in identifying his errors, insightful about handling pr school children and how they process information,very systematic approach /concept,challenging questions and tips to coach my child. The speaker was very 'down-to-earth' and practical in offering advice to parents. He was able to identify common mistakes made by parents and children.

**Workshop: Coaching your child effectively in problem solving**

**School: Tao Nan Primary School**

**Date: 8th March 2014**

The workshop was interesting and informative, providing simple strategies for problem-solving , good practical examples to problems that parents can relate to and useful tips. The trainer has a good sense of humour and uses a practical, down-to-earth approach with focus on process and not end-result. The presentation was very alive and direct to the point.

**Workshop: Helping your child to be conceptually strong in Mathematics**

**School: St Gabriel's Primary School**

**Date: 19th January 2013**

The trainer gave a lively presentation with relevant examples in a humorous way. It opened up my understanding of math solving methods, gained better understanding of the concepts and different methods to tackle problem sum questions. It pointed out common errors in concept that we need to be mindful of. The exercise practices in class to elaborate the conceptual to model drawing skills. Understanding the difference between conceptual and procedural approach. It gives an insight into the pupils' thoughts and

**Workshop: Coaching your child in problem solving:**

**Developing their conceptual understanding**

**School: Compassvale Primary School**

**Date: 4th June 2013**

Covers different contextual skills with good examples. I have learnt advance model and better understanding solving difficult questions. Guided solution, strategies and methods well explained. Understanding more about primary Maths, eye-opener! The trainer is very patient and professional in his teaching. Trainer is very clear and made Maths interesting also. I have learnt advance model and better understanding solving difficult questions. Guided solution, strategies and methods well explained. Understanding more about primary Maths, indeed an eye-opener!

**Coaching Your Child Effectively P5 Parents Math Workshop**

**School: Compassvale Primary School**

**Date: 15 February 2014**

This is my third workshop. Every year trainer focuses on different difficult topics. Good! Trainer is very well trained and professional in his presentation. Learn a lot on how to solve model problem sums. Able to learn the strategy in Maths to help my child in the school work. Good strategies presented and clear explanation of concepts. Good teaching with concise examples and teaching. Trainer is lively and very clear in explanation.
